LMN Services and Clarke Engineering Services Partner with Adents to Provide Customized Serialization Software Solutions

Princeton, NJ – **LMN Services**, a North Carolina-based customer service company focused on the pharmaceutical industry, and **Clarke Engineering Services**, a pioneer in manufacturing and packaging services technology and solutions, have partnered with **Adents**, a leading provider of versatile and easily deployable serialization and track-and-trace software solutions, to offer their customers highly advanced and reliable safety and security software implementation options.

A premium solution for achieving compliance, minimizing counterfeiting or enriching marketing, Adents unit identification and traceability software is extremely flexible, easily scalable, and deploys quickly as it does not require add-on hardware. This “standardized software” approach to serialization also allows companies to accelerate their pathways to compliance, keep abreast of consumer safety, innovate with new communication channels, and gain valuable market insight.

With over 30 years of pharmaceutical sector experience, LMN Services offers a complete suite of expert level automation services – serialization, validation documentation, project management, and control systems. LMN Services is currently partnered with several multi-national pharmaceutical customers, managing and executing serialization programs and automation projects.

“LMN Services looks forward to sharing the Adents comprehensive serialization solution with our pharmaceutical customers,” said Mark Newsome, President of LMN Services. “The turnkey track and trace software is a key asset as we seek to help pharma companies stay in line with increasingly complicated serialization requirements around the world.”

The need for a complete solution to address track and trace mandates was also noted by, **Paul Edelman**, President of Clarke Engineering Services, a pioneer in manufacturing and packaging services technology and solutions. “Serialization software from Adents will help our customers leverage big data and gain competitive advantages through use of a personalized method of connecting brands to their markets with unique product identification. This fits beautifully with our promise to ensure brand protection by enabling quality, safe and compliant product development and production.”

Clarke Engineering Services is a leader manufacturing and packaging services technology and solutions that ensures brand protection by enabling quality, safe and compliant product development and production. The company’s proven methodology delivers best of breed processes and technologies for serialization, machine vision, FDA verification & validation, and operations & change management support.

James Cummings, VP Americas for Adents, said: “We are confident the expectations of the customers of our new partners, LMN Services and Clarke Engineering Services, will not only be met but exceeded. Our Pharma Suite Solution and global track and trace experience will enable their customers to comply with the approaching 2017 DSCSA deadline, and increase their safety and security implementation capabilities. We look forward to enjoying a mutually beneficial, long-term alliance.”

About Adents

Adents is a software specialist that develops unique product identification and traceability solutions, helping pharmaceutical manufacturers and contract packagers adapt to market changes and comply with serialization regulations. Adents Pharma Suite utilizes user-friendly, standardized software compatible with both information systems (ERP, MES) and existing production and packaging equipment. Easily upgradable, the software is designed to address both current and emerging regulations to help pharma companies remain in compliance long-term. Adents Pharma Suite serialization software was recently awarded an Innovation Award from Medicine Maker, a UK-based publication focusing on the pharmaceutical manufacturing sector.

Founded in 2007, Adents operates in the United States, Canada and Europe. For more information, visit www.adents.com.
