

## Serialization and Aggregation. Simplified.

Adents demonstrates Track-and-Trace capabilities of its software solution for the pharmaceutical industry at Pharmapack Europe 2016

**Paris – February, 9<sup>th</sup>, 2016** - Serialization will be one of the key topics at Pharmapack Europe 2016 taking place on 10<sup>th</sup> and 11<sup>th</sup> of February in Paris. Adents, the French unit identification and traceability software editor, will showcase its quickly deployable, exceptionally flexible, and highly scalable solution, dedicated to drug serialization and aggregation, combined with line equipment from its partners.

New laws and regulations, such as the EU Falsified Medicines directive (2011/62/EU), pertaining to the drug traceability mandate most pharmaceutical manufacturers to implement unit level serialization and aggregation processes on their packaging lines within challenging timeframes. It also entails major changes to production facilities, information systems, quality control and the structure of the industry's supply chain. With approximately 20,000 lines (Europe & US \*) and implementation waiting times up to 12 months, this transformation represents a major industrial challenge in the years to come for the pharmaceutical industry.

### **Adents Pharma Suite: the future-proof and innovative software solution to tackle the challenges of drug serialization and aggregation**

At Pharmapack Europe 2016, visitors will discover Pharma Suite, designed by Adents for the pharmaceutical industry. Based on a fully configurable and centralized architecture at site level, Adents Pharma Suite integrates easily with existing infrastructure and equipment, deploys quickly, and can easily manage all regulation requirements pertaining to drug serialization and aggregation.

The standardized approach from Adents offers major benefits:

- Speed to deployment, with an implementation of up to 5x faster than the competition
- Fewer qualification tests needed on high speed packaging lines, resulting in optimized productivity
- Solution and implementation management that meets the pharmaceutical industry's highest quality standards (GMP, 21 CFR Part 11 and GAMP5 guidelines)
- Improved cost-effectiveness with streamlined deployment and a competitive yearly license which includes maintenance

### **Two stands showcasing LIVE demos of Adents software combined with partner equipment.**

For 2 days, on stands 665 & 864, Hall 5.3, LIVE demos will be performed allowing visitors to see the serialization of boxes and multi-level aggregation using functional line equipment. In particular:

- **Adents Pharma Suite loaded on H2M Technologies and Transvis CTI serialization modules** equipped with diverse marking, printing and control systems.
- **Manual and semi-automatic aggregation solutions** in collaboration with Lixis et Control 6
- **Vision systems and an industrial PC from Siemens**

**Pharmapack 2016: Presentation of Siemens-and Adents joint solution dedicated to the pharmaceutical industry**

Siemens and Adents recently announced the development of a joint solution dedicated to drug serialization. The details of this collaboration will be showcased on stands 665 and 864 with both the Siemens and Adents teams on hand to answer any questions.

Pharmapack Europe 2016 will be the opportunity to meet experts from Adents and its partners and to benefit from their expertise in the fields of industrial processes and automation management, codification standards and unique identification and traceability software solution in the pharmaceutical industry.

**About Adents :**

Headquartered in Massy, France, Adents is a software specialist of unique product identification and traceability helping manufacturers from all sectors to adapt to market changes and comply with regulations on product traceability. Adents innovative solutions enable manufacturers and brands to protect themselves from counterfeiting and grey markets, better control their distribution channels and create a personalized link with their customers.

Founded in 2007, Adents operates in Europe, Canada, and the United States. For more info, visit [www.adents.com](http://www.adents.com)
